RE: PLEASE KEEP DOORS CLOSED – PLEASE SIGN UP WITH NAME AND GROUP NAME

Please keep the doors to room 125 closed at all times. This is done to keep the temperature stabilized at 22° C at all times. The reason for this is that it keeps the humidity low to reduce damage to optics and also keeps the optical alignment preserved in the best way by not allowing temperature fluctuations.

Please also sign up with your name and also with your group name in parenthesis (telephone number is also requested for external groups). The exception to this is AG HARMS who needs to service the microscopes for your use.

Sincerely,

Gregory Harms
